WHO AM I?

I'm a product- & project manager with a technical background. I've delivered software products from start to finish for startups and multinationals alike. Building and working with a technical team to deliver great products is where I am at my best. Certified as a SAFe Agile Product Owner/Product Manager and DevOps Practitioner.

- Project management
- Devops
- Python
- Scrum
- HTMl, CSS, JS
- Technical analysis

EXPERIENCE

Feb 21 – Present

Technical Analist & Scrum Master   **Baloise**

Working as a technical analist to translate functional requirements into technical designs. Creating UI designs and mapping services to guide development. Followup of larger projects over different teams. Helping and taking over scrum master tasks during large planning meetings. Part of pilot team implementing agile way of working which is now rolled out over the whole organisation.

transformation
```

Nov 20 – Present

Technical consultant   **Olbrew**

Building and maintaining ecommerce and small business websites. Both static with HTML, CSS, JS and dynamic with Wordpress or Squarespace. Connecting to 3rd party REST API's to sync ecommerce stock with front website. Technical guidance and support for small businesses in network setup, device management and maintenance.

```
Web Development / Technical Support / Networking / Ecommerce
```

Aug 20 – Nov 20

Project Manager & Technical Lead   **Rita Personal Data**

After working as part-time technical consultant I joined fulltime in August 2020 to lead the technical side and build a technical team. Built a team of remote developers by doing recruitment and coaching them. Responsible for planning, project management and technical architecture. I set out a technical architecture for the mobile app and did code review, set up devops, coding standards and issue tracking for all the projects. Project management was setup according to the agile framework scrum.

Feb 19 – Aug 20

Project Manager   **Lemon Companies**

Managing multiple software projects from initial conversations with clients until commissioning of delivered software, working closely with clients to understand requirements, designers to develop products and software engineers to build the solution. Managed large development team with up to 10 developers. Tasks included business and technical analysis, project management & product development. Managed their largest project for Big-Four client delivering complete billing management software solution for their accounting department working closely and coordinating among their different internal business and IT teams.

Analysis
```

| Nov 18 – Feb 19 | **Software Engineer** | **Lemon Companies** |

Responsible for maintaining our existing software solutions and supporting the clients use at multinational companies. Wrote proposals for incoming clients and planned these projects.

```
Software Engineering  /  Proposal writing
```

| Mar 18 – Nov 18 | **Data Privacy Officer** | **Deltaworx** |

To satisfy the requirements of the GDPR law and minimise business risk I analysed data flows and secured them by encrypting data in transit and at rest. I organised presentations to educate our employees on the law and created tools to delete data when asked for.

```
DPO  /  GDPR  /  Compliance  /  SQL
```

| Apr 17 – Nov 18 | **Lead Developer** | **Deltaworx** |

Managed and worked with IT team on a React Native app for students and a back-office planning tool in PHP. Split time between coding and managing the team. Setup AWS environment for serving backend systems and was responsible for its uptime. Deltaworx is a leading student job agency using digital solutions to better match students to employers.

```
Software Engineering  /  Project management  /  Product Owner  /  DevOps
```

| Jan 16 – Mar 17 | **Technical co-founder** | **Oxysnap** |

I did the initial development of a web-based prototype and later a mobile app and was responsible for hiring and project management. Oxysnap would allow photographers to instantly share their pictures during events or big occassions.

```
Project Management  /  Product Owner  /  iOS development  /  Web development
```

EDUCATION

HOBBIES

I love being out in nature and staying active to relax but also push myself. Best if I can combine the two. Skiing when it snows, kitesurfing when the wind blows. Running, biking or swimming when it doesn't, I run marathons and have participated in triathlons.
